FGT states that the instant filing comports with these provisions and FGT is posting notice of the flex adjustment on its EBB concurrent with the instant filing.

FGT states that since April 1, 1997 when the Base FRCP of 2.85% became effective, FGT has been experiencing increased throughput on its system and higher compressor fuel usage than is being recovered through the Base FRCP. Consequently, to minimize the operational problems experienced as a result of this underrecovery of fuel, and to minimize the balance of the deferred fuel account to be resolved in a subsequent period, FGT is increasing the Effective Fuel Reimbursement Charge Percentage to 3.35%.
